DESIGN SKILLS

Logo and brand identity
Graphic design
Web and UI design
Image editing and retouching
Typography and colour matching

DEVELOPMENT

HTML, CSS, JavaScript
React, Next.js, Tailwind CSS
PHP, REST APIs
MySQL, PostgreSQL
Vercel, Git

DOCUMENT PRODUCTION

Word documents (docx library)
PDF editing (PyMuPDF)
Image inpainting (OpenCV)

SOFT SKILLS

Teamwork
Written communication
Public speaking and presentation
Time management
Working under pressure

HOBBIES

Traditional music
Entertainment
Football

PROFILE

Creative designer and Information Technology student at RP-IPRC Tumba College, with an Advanced Diploma (A2) in Software Development. I design logos, graphics, web interfaces and print-ready documents, and I turn designs into working web pages with HTML, CSS, JavaScript, React and Next.js. I pay close attention to detail, work well alone or in a team, and keep improving through real projects and an industrial attachment at Algorithm Inc.

CREATIVE DESIGN EXPERIENCE

- **Logo and brand identity:** designed a complete HALO smartphone logo system covering the primary logo, symbol, wordmark, combined version, monochrome, reversed and small-size versions, and a phone application version, with vector source and export-ready files. The brief required a simple, memorable mark that works at very small sizes and in one colour.
- **Print and image editing:** edited a business budget document for Target Graphics, updating the service list and the text inside a rotated stamp while matching the original font (Poppins), colours and texture.
- **Web and UI design:** redesigned the seller dashboard header for the shop.ihute.rw marketplace and designed buyer and seller dashboards, shop categories and a multilingual interface in English, Kinyarwanda and French.
- **Document design:** produced formatted, submission-ready reports, including an Industrial Attachment Final Report with weekly activity tables and consistent academic styling.

PROFESSIONAL EXPERIENCE

Front-end Developer

Algorithm Inc., Gasabo · Industrial attachment, 7 weeks (35 working days)

- Worked on the Next.js marketplace and shop discovery app (shop.ihute.rw) with buyer and seller dashboards.

EDUCATION

2024 – Present
RP-IPRC Tumba College
Information Technology (in progress)

2020 – 2022
Muhabura Integrated Polytechnic College (MIPC)
Advanced Level (A2) Diploma in Software Development

2017 – 2019
ESS Hamdan Bin Rashid
Ordinary Level

2011 – 2016
Ecole Primaire de Rugarama
Primary Level

LANGUAGES

English
Kinyarwanda

- Added Electronics and Pizzeria shop categories with English, Kinyarwanda and French support.
- Fixed a session bug where a 30-day minimum overrode the 60-minute timeout, and added a user-facing auto sign-out selector.
- Redesigned the seller dashboard header.
- Wrote a professional report on three field-observed issues in the application: client preference for a mobile app, a broken "Near Me" feature and an unstable "Quick Shop" section.
- Produced the Industrial Attachment Final Report for RP-IPRC Tumba College.

Intern, Website and Application Development
SALTEL

- Built websites and applications, which strengthened my ability to develop complete web applications and to reach out to people.

PROJECTS

- **BFL Manager (community budget app):** Next.js web app with login, shopping-list budgets, purchase tracking with real-time balance, an admin announcements space and purchase notifications. Deployed on Vercel with a Neon PostgreSQL database; first built with React, PHP and MySQL.
- **Photo Hub:** location-based web app that connects clients with local photographers through radius search, portfolios, bookings, reviews and messaging. Designed on Next.js, Tailwind CSS, Neon with PostGIS and Vercel.
- **Commercial website:** full commercial website developed independently.
- **Local chat application:** chat application running on a local server, developed independently.
- **Graphic and document work:** HALO smartphone logo system and image edits to a business budget document for Target Graphics.

DECLARATION

I, Bertin MUHIRWA, certify that the information in this curriculum vitae is true and complete, and I authorize the verification of any information listed above.
